

ANJUM HOSSAIN

Address : Pollibidyut, Savar, Dhaka - 1344

Phone : +880 1700610483

Email : anjumhossainrafi16@gmail.com

LinkedIn : <https://www.linkedin.com/in/anjum-hossain-519a192b2/>

Github : <https://github.com/ahrafi16>

Portfolio : <https://anjumhossain.netlify.app/>

OBJECTIVE

To gain practical experience in computer science by improving programming and problem-solving skills, learning new technologies, and contributing to real-world projects as part of a collaborative team.

TECHNICAL SKILLS

- Programming Language: Javascript(ES6), Python, C
- Database: MongoDB, MySQL
- Front-end: HTML, CSS, Tailwind CSS, ReactJS, NextJS, API
- Others: Git&GitHub, Machine Learning

EDUCATION

BSc in Computer Science & Engineering

Jan 2022 - Dec 2025

Daffodil International University, Asulia, Savar

CGPA : 3.83 out of 4.00

Research based Project on “Deep Learning Approaches to Identify Deepfake Images”

Higher Secondary School (HSC)

2020

Savar Model College, Savar, Dhaka

GPA : 5.00 out of 5.00

Group : Science

PROJECTS

Exclusive(An ecommerce website):

- **Tech Stack:** React, Firebase, Tailwind CSS, DaisyUI
- **Live Demo:** <https://vermillion-entremet-c7f3c5.netlify.app/>
- **GitHub:** <https://github.com/ahrafi16/Exclusive>

User Features – Secure authentication with Firebase Auth, along with wishlist and shopping cart (add, remove, update) functionality.

Product Experience – Browse products with images, descriptions, pricing, and quickly find items using search and category filters.

Responsive Interface – Fully optimized design that works smoothly across mobile, tablet, and desktop devices.

AdoptBuddy(A pet adoption website):

→ **Tech Stack:** React, Tailwind CSS, InertiaJs, Laravel

→ **GitHub:** <https://github.com/hafizflow/AdoptBuddy>

Adoption Platform – Connects potential adopters with available pets, showcasing detailed profiles, images, and essential information.

User-Friendly Experience – Built with React, Tailwind CSS, and Inertia.js for smooth navigation, fast interactions, and a clean, responsive UI.

Reliable Backend – Powered by Laravel for secure data handling, user management, and efficient communication between adopters and the platform

COURSE-BASED PRACTICAL WORK

Lab Work:

- Developed web applications using React, Tailwind CSS, and Firebase
- Built Flutter mobile applications with Firebase integration
- Implemented machine learning models in Python

Final Year Project: Deep Learning Approaches to Identify Deepfake Images

- Designed an end-to-end deep learning pipeline
- Worked with image datasets and model optimization
- Collaborated with team member and presented results

CERTIFICATION

Solvio AI Hackathon - 2025:

- Role was Leader & Developer
- Certificate Link: [Solvio-ai-hackathon-certificate](#)

DIU Unlock The Algorithm Contest:

- Secured top 100 position

DIU Take-Off Programming Contest, Fall 2022:

- Attended to the final round

COMPLETED CORE COURSES

Completed Programming and Problem Solving, Algorithm & Data Structure, OOP, Operating Systems, AI & ML, Data Science, Compiler Design, Electrical Circuits ,Web Engineering, Mobile Application Design, Software Engineering

All Courses and grades : [marksheet link](#)
